**Objective:**
- Building more coherent communication and collaborative decision-making by responders, media and other communication actors through social listening and other pathways of engagement

**Services:**
- Developing and disseminating 2 bulletins on social listening and media analytics along with UNICEF, WHO, BBCMA, Internews partners and others
- Conducting consultations and producing a snapshot of the state of CCEA during phase 2 of the response
- Convening a CDAC-facilitated coordination forum, ultimately improving coordination of communication and information service provision

**Objectives:**
- Empowering in-country training initiatives and strengthening on-ground training capacity in East Libya for a sustainable and locally-led response into the future

**Services:**
- Conducting and publishing a Rapid Learning Needs Assessment report, translated into Arabic, outlining key capacity gaps and learning needs in the flood response
- Providing quality, accessible, needs-based learning and technical support to over 400 engineers and humanitarians on the ground (face-to-face and online)

| Social media monitoring and geopolitical analysis for the protection of the humanitarian space | **Objectives:**
- Strengthening predictive and mitigation capacities within the aid sector to enable better responses that respect humanitarian principles and protect staff and aid access
- Informing the aid community of sentiments towards the aid response as expressed on social media

**Services:**
- Social media monitoring and geopolitical analysis for the protection of the humanitarian space will focus on sentiment analysis to document attitudes towards the aid sector and the humanitarian space
- Filling key information gaps by providing a wider background on patterns of violence and geopolitical context

**Christina Wille**  
Director  
Christina.Wille@insecurityinsight.org |
| Data, information management and analysis | **Objectives:**
- Providing coordinated information management to guide humanitarian actors in flood-hit areas
- Enabling the humanitarian community to provide effective response assistance to crisis-affected communities with timely information

**Services:**
- Supporting coordination efforts within assessment and information management actors

**Ghassan Abou Chaar**  
Country representative  
ghassan.abou-chaar@impact-initiatives.org

- Implementing rapid/sectoral assessments to get a better understanding of the needs of flood-affected populations and internally displaced populations to support prioritization exercises and resource mobilization; will provide a clearer understanding to key partners of needs in the flood-affected region and areas of displacement in Libya

**Increasing contextual understanding of current and future humanitarian impacts through analyses**

**Objectives:**
- Providing humanitarian decision-makers with timely, comprehensive, and targeted analysis to increase contextual understanding of current and future humanitarian impacts by providing analytical reports

**Services:**
- Conducting anticipatory analysis on the upcoming rainy season, using available forecasting and mapping to highlight the areas most susceptible and vulnerable to flooding, and the humanitarian impact that can be expected
- Providing a deep-dive thematic note on protection concerns with a focus on MHPSS
- Convening another analysis - with topic to be determined based on findings from ongoing assessments and input from operational partners about the key analytical gaps and needs to best support the response (the assessment landscape is currently constrained, but it is expected to improve in the coming weeks.)
