

# H2H Network

## Tigray service package

The H2H Network activated its fund in response to a growing humanitarian emergency in the Tigray region of Ethiopia and neighbouring Sudan. Four specialized H2H member agencies will provide needs assessments and on-demand analytical services in support of the wider response. The service package is now fully operational and project activities will be completed by the end of March 2021.

**As part of the funded package, services are freely available to all responders.**

The network and its fund are supported by UK aid from the UK government. The network is hosted by the Danish Refugee Council. As part of this activation, the UK Embassy in Ethiopia is funding ACAPS on an earmarked budget line. The remaining funds, with the joint support of the H2H Network's fund and the embassy, have been allocated through the regular H2H Network fund process.

## H2H Network

### Getting more to people in need

**At H2H Network we work to improve the effectiveness and efficiency of humanitarian action.**

We assess humanitarian crises to define the type of response needed. We then coordinate specific network members to quickly provide relevant services to the humanitarian crisis. The network's services are easily accessible to all responders.

We have responded to crises including Nagorno-Karabakh, Covid-19, Cyclone Idai, Ebola in DRC and internal displacement in Burkina Faso.

**H2H Network members are expert and independent.**

Together we help the humanitarian sector evolve and cope with the changing scale and nature of humanitarian crises. We address sector-wide issues including the collection, management and analysis of data, community engagement, security management, logistics, accountability, standards and localization.
