

H2H Network

oPt support package

The H2H Network has activated its fund to provide rapid funding for specialized member agencies and coordinate efforts to strengthen the humanitarian response with short-term technical support in the oPt recovery period.

Three specialized H2H member agencies will support multilateral processes with technical services, tools and products including needs assessment, support for the provision of quality medical supplies and capacity building activities for local responders. The H2H oPt support package is now fully operational and project activities will be completed by the end of September 2021.

As part of the funded package, services are freely available to all responders.

The network and its fund are supported by UK aid from the UK government. The network is hosted by the Danish Refugee Council.

H2H Network oPt support package

Two member agencies specializing in data and information management, and security, logistics and programme support, will support and inform the wider humanitarian response. For further information, contact info@h2hnetwork.org.

Who?	What and where?	Contact

H2H Network

Getting more to people in need

At H2H Network we work to improve the effectiveness and efficiency of humanitarian action.

We assess humanitarian crises to define the type of response needed. We then coordinate specific network members to quickly provide relevant services to the humanitarian crisis. The network's services are easily accessible to all responders.

We have responded to crises including Nagorno-Karabakh, Covid-19, Cyclone Idai, Ebola in DRC, internal displacement in Burkina Faso and humanitarian emergency in Tigray, Ethiopia.

H2H Network members are expert and independent.

Together we help the humanitarian sector evolve and cope with the changing scale and nature of humanitarian crises. We address sector-wide issues including the collection, management and analysis of data, community engagement, security management, logistics, accountability, standards and localization.
